

JUMUIYA INNOVATION LAB

Jumuiya ya Kaunti za Pwani (JKP) is a regional economic development organization representing Kenya's six coastal counties: Mombasa, Kwale, Kilifi, Tana River, Lamu and Taita-Taveta. JKP is focused on championing the region's economic development initiatives through innovation and partnership with the public (County and National Governments), industry and academia. JKP's vision is aimed at "changing the story" of the Coast region by transforming the region into a high middle-income regional population with a special focus on the youth and women through employment and wealth creation. It seeks to sustainably harness the unique endowment of sea and land natural resources opportunities to catalyze a regional economic development movement into one of transformation and shared prosperity.

One of the key ways that Jumuiya intends to achieve this in in the establishment of Innovation labs across the 6 coastal counties. The Establishment of six (6) Jumuiya Innovation Labs is an anchor flagship project to changing the story of the region under Jumuiya 2030 framework. It Combines intervening strategies and regionally aligned policies in the JKP (6) counties to increase high school – TVETs/VTCs – University transition rate, facilitate entrepreneurial leadership with incubation of Micro- Small Medium Enterprises (MSMEs) and workforce development for employability with continuous professional growth (University System), high income and high productivity for equitable regional economic development.

OBJECTIVE OF PROJECT

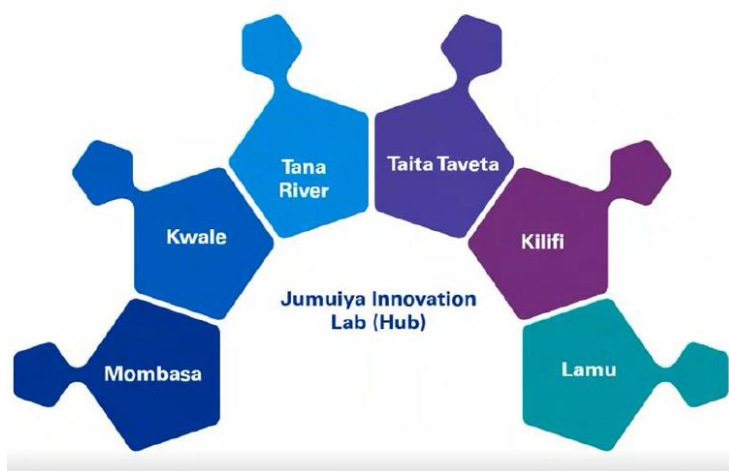

The Jumuiya innovation lab is a work force and MSME incubator that seeks to create employment opportunities and harness the latent talent existent among the youth in the region

- Structuring the youth empowerment space through business development and vocational education
- Strengthening the private sector engagement in Job creation for the coastal people
- Create an able skilled workforce to achieve the Jumuiya 2030- Middle income with shared prosperity by 2030 (Employment & Wealth)
- Combine intervening strategies and policies in the JKP (6) counties to align in achieving middle income with shared prosperity by 2030
- Facilitate self-employment with incubation and skilling of micro small medium enterprises (MSME) for employability & economic productivity
- Jumuiya Innovation Lab envisions to become the innovation hub for the East African Region. Exchange programs including knowledge exchange & stakeholder exchange will promote cross learning and regional cooperation.
- The Lab seeks to create international innovation bridges and market linkages/access to resources across international markets
- Ultimately the Jumuiya Innovation Lab seeks to be the last mile in the transition to economic productivity & prosperity

STRUCTURE OF THE PROJECT

The Hub and Spoke Model

The Establishment of six (6) Jumuiya Innovation Labs will be under a hub and spoke model. With 6 spokes in each of the 6 coastal counties and the Jumuiya innovation hub located in Mombasa

We have currently commenced the Mombasa EcoMSME lab in partnership with Ecobank Kenya to achieve the following

1. Centre for Workforce Skilling

The 6 Innovation labs will be a centre for work force skilling providing:

- Guidance to youth in helping them find a potential career path
- Vocational training to be tailor made for entering into specific/niche career paths
- Connecting youth empowerment organizations for relevant job placements

2. Centre for MSME Incubation and Skilling

- Skill and incubate 1000 MSMEs across various sectors such as agriculture, blue economy, trade and logistics
- Providing assistance to entrepreneurs on filling applications through the required approaches
- Capacity building training on starting and maintaining a business
- Training programs for youth entrepreneurs

3. Access to Finance

- Assistance towards linkages with financial institutions for credit
- Linkages with prospective investors/agencies

4. Business Enablement

- Administrative support towards seeking required approvals
- Market linkage solutions
- Innovation centres/hubs for industry specific sectors
